COURSE SYLLABUS

Generative AI Certificate

Master AI technologies for business, marketing, design, data analytics, and more in this cutting-edge certificate program. In this program, you'll learn how to optimize Excel workflows, create stunning video content, create captivating graphics, analyze data efficiently, boost workplace productivity, and more with the power of generative AI.

Course Outline

This package includes these courses

- Generative AI with ChatGPT (6 Hours)
- ChatGPT Level 2 (6 Hours)
- AI for Workplace Productivity with Microsoft Copilot (6 Hours)
- AI for Marketing Bootcamp (18 Hours)
- AI for Graphic Design (12 Hours)
- AI for Video & Motion Graphics (12 Hours)
- AI for Data Analytics (12 Hours)

Attend the AI for the Workplace with Claude course for free as part of this certificate. Choose your date after you register for the program.

AI for the Workplace with Claude

Generative AI with ChatGPT

Harness the creative power and efficiencies of AI with this hands-on workshop. Explore the cutting-edge world of artificial intelligence and learn how to generate text, ideas, images, and more with ChatGPT.

- Understand the fundamentals of generative AI and its applications and potential impact across industries
- Learn how generative AI models like GPT and Stable Diffusion work at a conceptual level
- Write effective prompts that generate accurate, useful, and creative responses
- Gain hands-on experience with popular generative AI tools and platforms
- Integrate generative AI into creative workflows, problem-solving, and innovation
- Analyze real-world examples of generative AI in action and explore its ethical implications

ChatGPT Level 2

Build on your foundational skills with advanced techniques to customize ChatGPT's behavior, enhance its research abilities, and explore voice, image, and project-based tools. This hands-on course is ideal for users looking to work more efficiently and creatively with the latest features in ChatGPT.

- Compare different ChatGPT models to understand their strengths, limitations, and ideal use cases
- Use reasoning and research models effectively, including how to leverage deep research features and connected apps
- Train ChatGPT to reflect your unique writing style or tone using targeted prompts and style adjustments
- Customize ChatGPT with saved preferences and learn how to create and manage personalized instructions
- Work with Projects and Custom GPTs to organize tasks, files, and workflows tailored to your specific goals
- Explore ChatGPT's voice and image generation capabilities, including hands-on practice using Sora for visual outputs

AI for Workplace Productivity with Microsoft Copilot

Discover how to boost efficiency and creativity with Microsoft Copilot, the AI assistant integrated into Microsoft 365. This course provides practical, hands-on training to help you apply Copilot across workplace tools and tasks.

- Understand the fundamentals of AI and how large language models (LLMs) like Copilot work
- Learn how to write effective prompts and refine Copilot responses across different workplace scenarios
- Explore how to use Copilot in Microsoft 365 apps, including Word, Excel, PowerPoint, Outlook, Teams, and OneDrive
- Automate and enhance everyday tasks such as email writing, meeting notes, data analysis, and document summarization
- Create AI-generated images and graphics, and understand the limitations and best practices of generative AI
- Compare Copilot with ChatGPT and GitHub Copilot, and identify when to use each for maximum productivity
- Stay up-to-date with the latest AI tools and mobile apps to extend your workflow beyond the desktop

AI for Marketing Bootcamp

Learn how to incorporate AI in your marketing strategy with this in-depth course. Explore how to use AI-driven tools to help your SEO, SEM, social media marketing, analytics tracking, paid advertising, and more.

- Leverage AI-driven strategy in your marketing campaigns
- Integrate AI into SEO, SEM, content, advertising, and analytics
- Measure the real-world impact of your AI marketing efforts
- Complete a capstone project to showcase your work

AI for Graphic Design

Explore how artificial intelligence is transforming graphic design with hands-on projects that integrate tools like Adobe Firefly, Midjourney, and ChatGPT. Learn to streamline creative workflows, enhance visual assets, and build cohesive brand packages using cutting-edge AI platforms.

- Generate vector illustrations, photo edits, and layouts using AI tools in Illustrator, Photoshop, and InDesign.
- Create original visuals through prompt-based image generation with ChatGPT, Adobe Firefly, Google Gemini, and Midjourney.
- Enhance and restore images with AI-powered sharpening, upscaling, and de-noising techniques.
- Use ChatGPT and Notion AI to develop creative briefs, brand names, and design directions.
- Build moodboards, style guides, and concept sets with free and paid AI design tools.
- Assemble a complete brand identity using multiple AI platforms in a simulated design workflow

AI for Video & Motion Graphics

Learn how to integrate generative AI into your video and motion graphics projects. This course covers AI-powered asset creation, workflow development, and the legal implications of AI-generated content.

- Understand how generative AI tools work and how they apply to creative production
- Use AI to support each stage of a motion design/video project: research, scripting, design, animation, audio, and delivery
- Prompt effectively across different AI tools (text, image, audio, video) for usable results
- Create AI-enhanced visual assets, scripts, voiceovers, and animatics
- Generate and run basic JavaScript/ExtendScript code using ChatGPT to automate repetitive tasks in Adobe Creative Cloud apps
- Deliver a short motion graphics or video piece enhanced by AI tools from start to finish

AI for Data Analytics

- Use AI tools to clean, explore, analyze, visualize, and report on datasets.
- Write better prompts for analytics work using practical patterns and structure.
- Check AI-generated results with a 7-step validation process.
- Build predictive models through natural language, with no coding required.
- Create a traceable workflow that supports accountability and reproducibility.
- Communicate and defend AI-assisted findings more effectively.
- Read a forecast for its uncertainty rather than its headline number, and know the four things that quietly break one
- Get themes and sentiment out of thousands of free-text comments, and run the check that decides whether to believe them
- Catch the harder errors that survive a first check: fabricated figures, trends that reverse when you split the data, and models that memorized instead of learned
