Course Outline

This package includes these courses

- InDesign in a Day (6 Hours)
- Photoshop in a Day (6 Hours)
- Illustrator in a Day (6 Hours)
- Premiere Pro in a Day (6 Hours)
- After Effects in a Day (6 Hours)

InDesign in a Day

Learn the fundamentals of Adobe InDesign, including page layout, typography, color, and using graphics. Perfect for beginners who want to get started quickly with InDesign.

- Create layouts with text, color, and graphics
- Import and style text and graphics
- Create a business card and bi-fold brochure
- Prepare files for final output, including printing and PDFs

Photoshop in a Day

- Learn to retouch photos
- Improve your images by adjusting color, contrast, and more
- Design graphics that combine photos, text, and graphics such as logos (can be used in social media & more)
- Save your images in the appropriate file formats for use on the web or print

Illustrator in a Day

Learn the fundamentals of Adobe Illustrator to start creating and editing vector graphics. This course covers core tools and techniques for working with shapes, colors, image tracing, and more.

- Learn to create different types of vector graphics, including icons and illustrations
- Combine basic shapes and use Pathfinders to create more complex vector shapes
- Convert hand sketches or pixel-based art into vector graphics
- Combine photos with type and add vector graphics to create designs for social media and more

Premiere Pro in a Day

- Learn to edit video & audio
- Add B-roll (extra video to make it more interesting)
- Bring in photos/logos and animate them
- Add transitions
- Export your videos for sharing on social media or delivering to a client

After Effects in a Day

Learn the basics of the Adobe After Effects interface, timeline, and layer animation in this accelerated training course. Gain the skills needed to create GIFs, animate logos, and work with layered files from Illustrator and Photoshop.

- Navigate the After Effects interface and understand the timeline and layer structure
- Create animations with graphics including logos, photos, and other visual elements
- Animate individual components of a logo for polished, professional motion graphics
- Import and work with layered files from Photoshop and Illustrator to streamline your workflow
- Export finished animations as GIFs or video files for use across digital platforms
