## Course Outline

### Advanced Query Techniques

#### Subqueries

- Subqueries: Queries within queries
- Single-Value vs Multi-Value vs Table-Value Subqueries

#### Aggregate Window Functions

Using OVER and PARTITION BY to apply Aggregate Functions

#### Conditionals with CASE

- Adding If-Else Logic with CASE
- Simple CASE vs Searched CASE
- IIF (Inline IF)

#### String Functions

- Manipulating text using string functions
- Using SUBSTRING, LEFT/RIGHT, CHARINDEX, UPPER, etc.
- Combining with Inline IF statements (IIF)

#### Self Join

- How a Self Join is different from other types of joins
- Using a Self Join

### Views, Functions, & Stored Procedures

#### Using Views

- What are Views?
- The Advantages & Disadvantages of using Views

- How to Use & Query a View

### **User-Defined Functions with Parameters**

- Using Scalar-Value (Single-Value) Functions
- Using Table-Value Functions

### **Executing Stored Procedures**

- The difference between Views, Functions, and Stored Procedures
- Using Stored Procedures
